Bosch Divar MR Pushing the right button

New generation Bosch Divar MR
digital versatile recorder

More than just a video recorder

More than just a video recorder, Bosch Divar MR is a complete CCTV management solution in an embedded unit. You get high-quality digital recording on up to 16 channels plus you can view and control cameras, handle alarms and check device status all through one convenient interface.

True to Bosch's reputation, Divar MR delivers excellent image quality with simultaneous, real-time recording in CIF* resolution on all channels. When even greater clarity is needed, you have the option of using 4CIF* resolution to capture more detail. Divar MR's highly efficient MPEG-4 compression significantly reduces bandwidth and storage requirements so you can store more detail and extend retention periods, all while reducing overall storage cost.

Convenience is key
Bosch Divar MR's clever features increase the convenience of DVR operation. View several live images and a single playback scene simultaneously to compare past and present events. You can capture an event at the press of a button on the Divar MR's front panel, and receive an e-mail notification when an event occurs. The 'Smart Search' utility helps you find recorded images quickly by looking for changes in a selected area.

And your recordings can be secure with Divar MR's overwrite protection capability. Recordings can be exported to CD or DVD media as well as to USB memory devices. An archive player is included in the external media for quick access to exported recordings, so there's no need to install additional player software on your PC. And the archive player includes an image authentication feature, ensuring that you can use them in court if required.

Feature
Simultaneous live and playback viewing, Smart Search, e-mail event notification and protection of recorded events
Compatibility with Bosch CCTV keyboard, Bosch and third-party dome and PTZ cameras
Variety of control and input options including mouse, CCTV keyboard, front panel and IR remote control
Real-time recording and playback in CIF* resolution
Control Center software for centralized viewing, playback and remote configuration

Benefit
Hassle-free management of recorded video and event handling
Flexible and easy control and installation of movable cameras
Easy to operate from various access points
Delivers important details in fast-changing scenes
Operate Divar MR on-site or remotely using the Control Center software

Abundant flexibility
Bosch Divar MR gives you the freedom to choose from several options for interfacing with your system:

- ▶ Bosch's IntuiKey keyboard gives you easy-to-use system control at your fingertips
- ▶ Use the front panel control buttons including a jog dial for quick access to the system
- ▶ A standard mouse or IR control puts your security in the palm of your hand

The intuitive Divar MR Control Center provides complete remote management of the Divar MR system including live viewing and control, playback, configuration and remote alarm notification. With Divar MR Control Center all operation and control can be centralized to create a highly scalable video management solution. For added convenience, users can also view live images using Internet Explorer, making your security accessible from virtually anywhere you need it.

Choose your solution

- Affordable yet packed with exceptional features, Bosch Divar MR presents the perfect solution for a wide range of applications, including:
- ▶ Retail applications
 - ▶ Schools
 - ▶ Apartment buildings
 - ▶ Hotels

Divar MR is available with 8 or 16 channels and a variety of hard drive capacities, and if required, an internal DVD writer to satisfy a range of applications. Divar MR is a recording solution you can depend on, and one that suits your needs for features, performance and value.

Ready to put Divar to work for you? Talk with your Bosch dealer today to learn more about how Divar can provide the right surveillance management solution for you.

*CIF (Common Intermediate Format) is pixel resolution standard for video. CIF defines a video sequence with a resolution of 352x288 for PAL and 352x240 for NTSC, while 4CIF equates to a resolution of 704x576 for PAL and 740x480 for NTSC.
